

**Does your child need some help  
with their social skills?**

**Try out our  
Specialty Group -  
Social Skills Training**

**This Specialty Group, led by highly skilled representatives from the Speech Therapy Department, will focus on helping your child's social skills to be able to interact more effectively with those around them. Parents will receive training for approximately the first 10 minutes of each session to review what will be covered, provided with information on activities that can be done at home on a daily basis, and answer any questions they may have. A maximum of four participants per group will then work on their social skills. This group will focus on turn taking, greetings, body language and facial expressions, handling emotions, appropriate interactions with others, being a good friend, and making new friends. Help your child learn new skills! Participants will be grouped according to their needs. This 1x/wk for 12 weeks, 45 minute Specialty Group, will help get your child ready!**

**To participate in this Specialty Group, you must agree to sign up to participate each session the Group is offered for the 12 weeks. The cost is \$45 for each session. Payment is due on the first session of the month for the total number of sessions within that month. For example, if there are four sessions in one month, then \$180 is due on the first session within that month. When paid upfront for the 12 week Specialty Group on the first session, the discounted fee is \$500 instead of \$540.**

**Two Group Times Offered: Monday's 4 - 4:45 pm and Tuesday's 3:45 - 4:30 pm**

**Call 615-443-4445 to register! Limited space available!**
